WORK EXPERIENCE

Game Director, Unreal Engine Developer

Self Employed, Marooned Tales Game Studio

Jun 2025 – Present

Bochum, Germany

- Leading the end-to-end development of *The Seventh Proof*, a story-based horror adventure game; Architecting scalable gameplay systems and engine features primarily using C++, Unreal Engine 5, and Shader Scripting.
- Directing the game's creative vision, including gameplay systems, narrative, world-building, cinematic design, and technical architecture; Producing comprehensive game design and technical documentation to guide development.
- Developing production-ready tools, systems, and pipelines to improve workflow efficiency, optimize performance, and accelerate iteration; Leveraging modern Unreal Engine features including Control Rig, Enhanced Input, AI systems, and rendering technologies.

Unreal Engine Tool Developer, QA Engineer

Sportradar AG

Dec 2024 – Mar 2025

Bremen, Germany

- Developed and deployed an automated testing framework for high-quality pre-rendered gameplay video assets; Optimizing the QA process using Unreal Engine 5 Automation Tools and Unreal Pixel Streaming.
- Collaborated with Dev/Art teams to design, test, and validate Unreal Engine 5 assets. Integrated CI/CD workflows in GitLab to streamline asset validation, visual comparison, and performance benchmarking.

Unreal Engine Developer, Technical Game Designer

Technische Hochschule Köln, Cologne Game Lab

Jan 2024 – Nov 2024

Köln, Germany

- Architected and developed custom automation tools using Python/C++ for the Unreal Engine 5 editor; Hugely improved the designers and artists' workflow efficiency by saving around 20 hours of manual work weekly.
- Identified and resolved CPU/GPU bottlenecks using Unreal Insights for Optimization; Increasing FPS by 30% utilizing efficient C++ multithreading (Task Graph) and Profiling Tools.
- Streamlined version control processes for a 7-member team; Significantly improving deployment efficiency by leveraging Git and Perforce.

Game Development Lecturer

Tokio New Technology School

Jul 2022 – Sep 2023

Madrid, Spain

- Taught principles of C++ game development inside Unreal Engine 5.
- Instructed Unreal Engine 5 covering a broad range of topics including level design, Blueprint scripting, Shader scripting, Lumen and Nanite.

- Responded to student concerns and assessed submissions weekly, cutting response times by half and leading to a 40% boost in satisfaction ratings.

Game Evaluation Manager

Hezardastan Information Technology Development Group

Sep 2019 – Oct 2021

Tehran, Iran

- Developed a robust performance forecasting model using C++ and Python, predicting and optimizing the KPIs for +80 mobile games.
- Analyzed and evaluated over 50 prospective games' design and development procedures to heighten their standards for the market.
- Created interactive reports using MS Power BI to highlight genre trends, incorporating infographics and research synthesis; facilitated a 70% reduction in data interpretation time.

Chief Game and Narrative Designer, Unreal Engine Developer

Infinite8 Game Studio

Nov 2016 – Mar 2019

Abu Dhabi, UAE

- Designed and prototyped over 12 core gameplay mechanics and modules for as Action RPG Roguelike, Implementing with C++ and Blueprints.
- Devised and implemented core prototype game systems within Unreal Engine 4, including character progression system and AI Behavior Tree.
- Authored comprehensive design and technical documentation with Office/Visio/Machinations; Decreasing project turnaround time by 40%.

Product Owner, Unreal Engine Developer

TGBS Studios

May 2013 – Apr 2016

Tehran, Iran

- Spearheaded the game development lifecycle, starting from conceptualization and paper design to the final delivery.
- Implemented Agile and Lean development methods using Jira and Confluence, boosting team productivity by 35%.
- Developed and tested new gameplay features for a tower defense game utilizing Unreal Engine 4 C++ and Blueprint scripting.

Game Designer, Level Designer

Espris Pouyanama

Aug 2008 – Mar 2010

Tehran, Iran

- Designed level structure, enemy placements, and cinematic events for a historical First-Person Shooter title using Valve's Hammer Editor.
- Created level design documents including layouts and mechanics.
- Authored side story and quest content for the game's sequel.

PROJECTS

ISEDA Police Training and Victim Interview Simulator | Published Game | Unreal Engine 5 [🔗](#)

Naxia | Steam Published Game (Early Access) | Unreal Engine 4 [🔗](#)

The Seventh Proof | WIP Personal Project | Unreal Engine 5 [🔗](#)

The Shining Cinematic | University Project | Unreal Engine 4 [🔗](#)

Frozen Fever | Steam Published Game | Unreal Engine 3 [🔗](#)

EDUCATION	
M.A in Game Development and Research <i>Technische Hochschule Köln</i>	Sep 2021 – Nov 2024
M.A in English Literature <i>SBU University</i>	Sep 2013 – Jun 2015

SKILLS	
Technical	(C++, C#, Unreal Engine, Unity, Blueprint Scripting, Git, Perforce, Engine Architecture, Code Review)
Design	(Game Design Principles, Narrative Design, Story Writing, Cinematic Design, User Experience)
Tools and Frameworks	(Jira, Confluence, Trello, Project Management, Agile, Scrum, Google Workplace)

LANGUAGES	
English	(C2, Bilingual)
German	(A2, Conversational)
French	(A1, Basic)
